SHREYA SHARMA

Gurugram, India | shreyakaushal9760@gmail.com | +91-6398209897
GitHub: github.com/shreyasharma76 | Portfolio: shreyasharma

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building and integrating machine-learning features, backend APIs, data-processing workflows, and AI-powered applications. Experienced with Python, NLP, model evaluation, FastAPI/Flask, and production-oriented integrations across health-tech and speech-transcription projects. Comfortable collaborating across model, backend, and deployment workflows.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, HTML, CSS
ML / AI: Supervised Learning, NLP, Recommendation Systems, Similarity Scoring, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Transformers, Computer Vision
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, PyTorch, TensorFlow, Hugging Face Transformers
Backend / APIs: FastAPI, Flask, REST APIs, Node.js, API Integration, Data Validation
Data / Tools: Power BI, Git, GitLab, Docker, Redis, PostgreSQL, MongoDB, SQLite, VS Code

PROFESSIONAL EXPERIENCE

Matchbest Software Private Limited | *Gurugram, India*
AI/ML Intern • *Aug 2026 – Present*
- Contribute to AI/ML features and backend integrations across health-tech and AI product workflows.
- Work on model-backed features including eye-health analysis, skin analysis, posture assessment, barcode/nutrition flows, and packaged-food label comparison; support API integration, testing, and reliability improvements.
- Build and test AI-assisted product capabilities involving image analysis, recommendation workflows, and model-service integrations.
- Contribute to a Google Meet transcription extension with tab and microphone audio capture, audio mixing, real-time transcription integration, language selection, and resilient provider/error handling.
- Support evaluation and debugging of model outputs using benchmark datasets, accuracy/triage metrics, regression tests, and targeted prompt/schema improvements.
- Collaborate on backend services and deployment workflows involving FastAPI, Node.js, PostgreSQL/Prisma, Redis, and cloud-hosted model services.

ShuniyaVigyan Pvt. Ltd. | *Remote*
Machine Learning Engineer • *Apr 2025 – Jan 2026*
- Developed machine-learning workflows for structured and semi-structured datasets.
- Performed data preprocessing, feature engineering, and transformations for model-training pipelines.
- Built and optimized similarity-based and classification-driven ML modules.
- Applied model evaluation and cross-validation techniques to assess performance and reliability.

ShuniyaVigyan Pvt. Ltd. | *Remote*
Trainee – Python & AI Systems • *Jan 2025 – Apr 2025*
- Completed structured training in Python, Flask, backend development, and API integration.
- Supported internal software modules under supervision.
- Gained practical exposure to AI workflows, data processing, and system reliability.

SELECTED PROJECTS

Google Meet Live Transcription Extension | *Chrome Extension, AudioWorklet, FastAPI, WebSockets, Speech APIs*
- Implemented browser-based capture and mixing of Google Meet tab audio and microphone input, with 16 kHz PCM processing and audio-level telemetry.
- Added multilingual transcript options, microphone permission handling, graceful API/rate-limit errors, and a backend integration for transcription.
- Validated audio-source combinations, permission-denied handling, stream cleanup, and no local audio persistence in the tested workflow.

HealNova AI – Health Model & API Integrations | *Python, FastAPI, Node.js, PostgreSQL, Prisma, Redis*
- Contributed to AI-enabled health workflows such as eye analysis, skin assessment, posture analysis, barcode lookup, and nutrition-label comparison.
- Supported model/API integration, input validation, response normalization, evaluation, and regression testing.
- Evaluated eye-analysis results against a 352-image benchmark and tracked exact-match and binary-triage performance to guide improvements.

Notification Recommendation System | *Node.js, BytePlus Recommend, PostgreSQL, Redis*
- Implemented recommendation-oriented notification workflows with device/user data integration and supporting cache/suppression logic.
- Worked with notification services, broadcast flows, and scheduled processing patterns; tested notification lifecycle and regression scenarios.

AI Job Role Matching System | *Python, Scikit-learn, Pandas, NumPy, SQL*
- Built an ML/NLP-based job-role matching workflow using text preprocessing, feature extraction, vectorization, and similarity scoring to align resumes with job descriptions.

Employee Management Dashboard | *Python, Pandas, Matplotlib, Power BI*
- Prepared and analyzed HR datasets, performed trend analysis, and created visual summaries to surface employee and operational insights.

Movie Recommendation System | *Python, Pandas, NumPy, Scikit-learn*
- Developed a hybrid recommendation engine combining collaborative and content-based filtering, exploratory analysis, feature engineering, and cosine similarity.

EDUCATION

K.R. Mangalam University | Gurugram, India | Master of Computer Applications (MCA) | 2023 – 2025
Sri Dev Suman Uttarakhand University | Uttarakhand, India | Bachelor of Science (B.Sc.) | 2020 – 2023

CERTIFICATIONS

Fundamentals of Artificial Intelligence & Machine Learning • Data Analysis using SQL & Power BI • Flask & Backend Development (Python)
